

New Service Rates Starting July 1, 2021

New rates for solid waste and recycling services will go into effect on **July 1, 2021**. Due to new EPA methane emission standards all municipal solid waste customers will be assessed an environmental impact fee, equal to 3.25% percent. Proceeds from this impact fee will be used to construct, operate and continue to accommodate future expansion of a mandated landfill gas emission system at the Corralitos landfill. As solid waste and recycling costs throughout the industry continue to rise, SCSWA is committed to managing those costs and staying efficient while upholding our commitment to a sustainable future.
